Fuel Injection Systems and Parts

EFI Clean Modular

The EFI-Clean Modular Fuel-Treatment System was developed to meet different customer requirements. For example it is possible to equip the system with an internal sludge tank. If a collector line is available on-site the sludge tank isn't necessary.

Specifications:

- Fuel filtering up to particle size of $< 3 \mu\text{m}$
- Water Separation $< 0.1\%$
- Capacity 2500 litres/h (DFO / MDO)
- space-saving concept
- Self-contained operation, auto monitored
- Self-cleaning particle filter
- low maintenance
- Increased Reliability & Operational Safety
- Excellent price-performance ratio
- CE and US approvals

Application: Marine, Power plants, Railway and many more
